KIRBY MEDICAL CENTER

What Is Telepsychiatry?

There is no question that telemedicine has become an essential service within healthcare in the United States. The lack of access to proper psychiatric care is one of the biggest struggles of the American public health system, and telepsychiatry has opened doors to obtaining quality care- despite geographical location.

Telepsychiatry is one of the most promising developments in the fight to provide more patient-centered, affordable, and effective interventions for individuals who need psychiatric care.

How It Works

If seen from the clinic, at the time of your appointment, you will be led into a private room by our Medical Assistant. The Medical Assistant will take your vitals, communicate them to your provider, and then leave the room (you may request her/him to stay) and your consultation with your provider will begin. If you are being seen from your home, you will be provided a link to access the virtual appointment with your provider.

These telepsychiatry sessions are private and confidential. Over time, patients and practitioners develop a strong relationship.

Meet Dr. Julie Baldinger, DO!

Dr. Julie Baldinger was born and raised in Northern Virginia, outside of Washington, D.C. She attended college at the University of Virginia where she was selected to be a member of Phi Beta Kappa, and she attended medical school at the Edward Via Virginia College of Osteopathic Medicine in Blacksburg, Virginia, graduating with Honors. In medical school, she spent time rotating through hospitals in Florida and South Carolina before returning to Virginia to complete a Psychiatry Internship at the University of Virginia, followed by an Adult Psychiatry Residency at Georgetown University. She then went on to attend the University of Virginia again for her Child/Adolescent Psychiatry Fellowship. Dr. Baldinger is a member of the American Psychiatric Association and the American Academy of Child and Adolescent Psychiatry.

Dr. Baldinger enjoys all realms of Psychiatry with a passion for children, young adults, as well as older adults dealing with depressive and anxiety-related disorders. While she has a breadth of experience in both inpatient as well as outpatient centers, she most enjoys the outpatient realm in which she can follow with her patients long-term. She focuses on treatment of the individualized patient and caters her pharmacological treatment to the individual. She provides care in an open and non-judgmental way, and she effortlessly seeks to destigmatize mental healthcare with the goal of greater access of care to all populations.

Outside of Medicine, Dr. Baldinger enjoys all things fitness-related, the outdoors and spending time with family/friends and her two rescue pups, a Great Dane and Terrier mix. With a passion for animals, she has a dream of one day opening a sanctuary for abandoned animals and integrating this into her care of patients.

Dr. Baldinger is excited to join the team at Kirby Medical Center!
